

# Environmental labelling of Invertek packaging

2023/V.1

All Invertek Drives' packaging, to comply with regulation, uses materials that are made of recyclable products and material compositions are provided corresponding with the European Commission Decision 97/129/EC.

This document in compliance with the decree contains the following: Packaging material composition identification through alphanumeric coding, instructions for how materials should be separated for waste collection, and example images representing possible items.

Additionally, dispatch documents are provided alongside all shipments, and will be marked with the required information: alphanumeric material identification codes for packaging materials, and a website address for further details of the packaging materials contained within the shipment.

The following table contains all the required information to meet the environmental labelling regulations in Packaging Directive: 97/129/EC and should be used to facilitate collection, reuse, recovery & recycling and should be used to determine the final destination of Invertek Drives' printed and non-printed packaging. For separate collection, please check local guidelines.

Please contact your local Invertek Drives Sales Partner for further assistance.
